

Doctor of Philosophy Scholarship in Theoretical Particle Physics

The Department of Theoretical Physics at the Jožef Stefan Institute is announcing an opening for one international scholarship towards a PhD awarded by the Faculty of Mathematics and Physics of the University of Ljubljana.

The recipient will be hosted by the particle physics group that supports a dynamic environment with regular international seminars and collaborations. The group expertise includes physics of flavor, neutrinos, colliders, grand unification, dark matter and lattice.

The scholarship is funded by the Slovenian national agency and consists of a monthly salary with travel funds and lasts up to four years, starting from the fall of 2016.

The application should contain a cover letter, curriculum vitae and a letter of recommendation. In order to be considered, the application should reach us by June 20th 2016.
